Avtec Finishing Systems Awarded *Products Finishing's* Elite 2022 Top Shops Distinction

June 22, 2022 - Each year, major coating and finishing shops across North America participate in *Products Finishing's* Top Shops Benchmarking Survey, a program designed to aid finishing shops in measuring their key operating metrics against others in the industry. Launched in 2015, *Products Finishing's* Top Shops program helps finishers identify optimal shopfloor practices and improve business operations and procedures.

“The *PF* Top Shops Benchmarking Survey is celebrating its 8th year of providing industrial finishers with a deep dive into how their shop is performing along with a comparison of their data against their peers,” says *Products Finishing* publisher Todd Luciano. “It also provides a meaningful and non-biased way to recognize and commend the finishing companies that go above and beyond in their markets and are leading the industry in advancements and innovation.”

Avtec Finishing Systems has been selected as a *Products Finishing* Top Shop in electroplating and anodizing for 2022, based on data analytics from this year's Top Shops Benchmarking Survey.

“Congratulations to the team at Avtec upon qualifying as a 2022 *Products Finishing* Top Shop,” said *Products Finishing* editor-in-chief Scott Francis. “The Top Shops vetting process is stringent and being selected is a testament to the hard work you do and the contributions you make to the industry.”

Hundreds of shops participate in Top Shops annually, resulting in a wealth of data and statistics that prove invaluable for discovering and assessing areas for growth and improvement, including finishing technology, performance and practices, business strategy and human resources.
